

17-19 November 2020

GS1 Healthcare Online Summit

Global Standards for Global Health

An online global conversation, bringing together the global community of Healthcare stakeholders in a new fast paced and interactive format. The schedule includes three days of targeted learning and discussion around global standards for healthcare, both for today and tomorrow.

Key topics

We will dive into the role of global standards for global health with topics including:

- Global access to healthcare supply chains.
- Managing supply shortages.
- Patient safety in times of crisis.
- The regulator's role in driving the accelerated deployment of global standards

3 days

6 targeted sessions

30 Speakers

Sessions

- 1 DAY ONE
 - Building strength in the changing delivery of healthcare
 - The value of digitising the supply chain
